Personal Profile

AI Researcher and Machine Learning Engineer with an advanced background in Artificial Intelligence Systems. Expert in building, training, fine-tuning, and optimizing deep learning models, LLMs, and RAG architectures. This core foundation is backed by practical project experience in multi-agent systems and inference optimization. Leverages the elite discipline and focus of a former professional athlete to seamlessly drive projects from theoretical research to enterprise-ready execution.

Work Experience

AI Researcher <i>GPI — Remote</i>	Jul 2024 – Present <i>Full-Time</i>
- Specialize in building, integrating, and fine-tuning state-of-the-art AI models, focusing on Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and multi-agent workflows. - Design and deliver innovative AI-driven automation and decision-support solutions tailored for healthcare operators.	
Software & Data Engineer <i>SATE S.r.l. — Venice, Italy</i>	May 2024 – Jul 2024 <i>Full-Time</i>
- Migrated and integrated compiled MATLAB codebases onto bare-metal target machines, translating high-level algorithmic simulations into efficient, low-level hardware execution. - Optimized system latency and resource utilization by refactoring and cross-compiling mathematically complex software components for resource-constrained hardware environments.	
Machine Learning Intern <i>Photoroom — Paris, France</i>	Apr 2023 – Sep 2023 <i>Internship</i>
- Collaborated closely within the ML core team to explore, implement, and validate innovative deep learning approaches for upcoming Photoroom application features. - Accelerated production inference pipelines by optimizing complex machine learning models utilizing ONNX and TensorRT frameworks.	
Software Engineering Intern <i>Amazon AWS — Asti (Turin), Italy</i>	Aug 2021 – Oct 2021 <i>Internship</i>
- Engineered native gamepad peripheral support for the NICE DCV high-performance remote desktop streaming protocol using C and Rust. - Contributed to a high-impact, large-scale codebase while adapting to rigorous enterprise team-working and agile project management standards.	
R&D Software Intern <i>VUI — Remote</i>	Mar 2021 – May 2021 <i>Internship</i>
- Developed a complex conversational user simulator built specifically to generate synthetic training datasets for advanced dialogue systems. - Deployed the simulator framework to successfully train a reinforcement learning agent, serving as the foundational codebase for Bachelor's thesis research.	

Education

University of Trento <i>Master of Science in Artificial Intelligence Systems</i>	2021 – 2024 Final Grade: 110/110 Cum Laude
University of Trento <i>Bachelor of Science in Computer Science</i>	2018 – 2021 Final Grade: 110/110 Cum Laude

Skills

- AI & Machine Learning:** PyTorch, Pandas, VLLM, Ollama, LangChain, LangGraph, Model Fine-Tuning, RAG Architectures, Data Collection & Evaluation
- Software Development:** C, C++, Python, Java, Rust, Algorithms, Data Structures, Databases, Cybersecurity

- **Web Development:** Node.js, Java Servlets, JavaScript, jQuery
- **Languages:** Italian (Native), English (B2), Spanish (A2)
- **Core Competencies:** Cross-functional Teamwork, Project Management, Technical Problem Solving, Agile Adaptation

Certifications & Awards

- **Cyberchallenge.it:** Finished 3rd place in the local final and 12th place nationally representing the University team in rigorous competitive training (Reversing, Cryptography, Network Security, Pwning, Web Security).
- **Italian Swimming Championship:** Gold Medalist / Youth Champion in the 100m Freestyle (March 2015).
- **European Youth Olympic Festival (EYOF):** Selected athlete representing the Italian National Swimming Team (2015).
- **Panathlon Award:** Consecutively awarded in 2014 and 2015 for achieving exceptional concurrent athletic and academic results.

In compliance with the Italian Legislative Decree no. 196 dated 30/06/2003, I hereby authorize the recipient of this document to use and process my personal details for the purpose of recruiting and selecting staff and I confirm of being informed of my rights in accordance to art. 7 of the above mentioned decree.
